Problem Statement

The PV of the node1 host has an unknown state. Previously, an attempt was made to synchronize information using lvscan, but it failed. It is intended to synchronize information by restarting the host.

Operation Node and Precheck List

Hostname	IP Address
Node1	1.1.13.5
Node2	1.1.13.6

Trouble Ticket Number	123
Severity	Low
Involved Module	adcd
Network Issue	No
Description	adcd - Fix the abnormal Process Issue of Project
Root Cause	None
Modification Description	Fix the abnormal Process Core Issue of Project.
Modification Impact	N/A
Verification Instruction	Expected Result: When the existed configure openflag is closed, report data will no longer be written to private memory and normal session recycle can be triggered successfully.
